

LO: To identify and classify different common animals.

**Please use the BBC Bitesize videos that are linked in your child's home learning letter this week to support their learning.**

What are mammals? What are amphibians? What are birds? What are fish? What are reptiles? What are mini beasts?

Please think about all the different common animals and share ideas of how they belong in different categories, due to their habitat or how they feed their young.

**Challenge:**

To label each picture and write the animal group they belong too.
