

Outdoor Challenge 9 – Signs of Summer

The weather is going to be gorgeous this week so why not go out into the garden and see what you can find. If you cannot get out, you can still look through a window and see signs of Summer.

How many different signs can you find? For example: a tree full of leaves; a nest; fledglings (young birds that have flown the nest) being fed or feeding themselves; swallows and house martins darting about; a house martin's nest on the side of a house; flowers being visited by insects such as bees, hoverflies and butterflies; birdsong; warm weather; blue sky. Can you spot anything that is not on the list?

There are loads of spotting sheets in the link below.

<https://www.wildlifewatch.org.uk/spotting-sheets>

Have fun and don't forget to email a photograph to school!
